EDUCATION

University of California, Los Angeles (UCLA) | Los Angeles, CA **Expected Dec 2027**
B.S. Cognitive Science, Specialization in Computing | Minor in Statistics & Data Science | GPA: 3.7/4.0
Coursework: Data Structures & Algorithms, Python with Applications, Probability & Statistics, Neural Networks Lab
Honors: BCG Case Competition Finalist, Bain Case Competition Finalist, Perplexity Campus Strategist

PROFESSIONAL EXPERIENCE

Accenture | Management Consulting Summer Analyst | San Francisco, CA **Jun 2026 - Aug 2026**

- Pitched and built an LLM workflow on the Anthropic API to cross-reference a F500 semiconductor client's SAP S/4HANA learning curriculum against role requirements, replacing 10 hours of manual review per cycle.
- Product lead for a staffing-forecast dashboard for a leading AI lab's support org, directing 2 interns from requirements through build and modeling daily agent demand from 18 months of ticket data.
- Defined the data architecture for an AI relationship-intelligence platform for the SF Office Managing Director, scoping integration across Microsoft Graph 365, Workday, and CRM.
- Mapped Accenture's talent-staffing processes across ~10 disconnected systems for an internal demand-forecasting initiative, identifying process gaps and manual handoffs between Sales, Finance, HR, and Delivery.
- Built a PMO setup tool that parses a statement of work and auto-generates setup checklists, PMO structure, and meeting cadences as Word, Excel, or PowerPoint outputs, saving ~15 hours per project setup.
- Built interactive HTML workshop materials with Claude for a C-suite executive workshop, winning leadership buy-in.

Intuit | Strategic Finance Intern | San Diego, CA **Jun 2025 - Sep 2025**

- Owned the end-to-end product roadmap for the ID Data Deletion feature, modeling adoption curves and partnering across engineering and partner teams to align go-to-market planning.
- Queried and segmented tax filer data in Databricks (SQL), turning adoption patterns into pricing recommendations presented to senior leadership and informing a change projected at \$15M+ in FY26 revenue.

Avalerian Capital | Private Equity Intern | Miami, FL **Sep 2024 - Jan 2025**

- Screened 150+ growth-stage B2B SaaS companies weekly using a repeatable framework, cutting evaluation time 60%.

PROJECTS

Chief of Staff Agent | Python, Anthropic API, Gmail & Google Calendar APIs **Jun 2026**

- Built an autonomous agent with 7 callable tools that resolves multi-step scheduling and triage across 2 accounts, running unattended on a launchd schedule and saving 30 minutes daily.
- Shipped a deterministic rules layer first, replaced it with an LLM reasoning step where output degraded on ambiguous inputs, and added daily spot-checks to keep agent behavior predictable.

Adapt | Lovable, Supabase, Web Speech API, LLM reasoning layer **Jun 2026**

- Shipped an RPE/RIR-based autoregulated lifting app end to end, replacing fixed if-then progression logic with an LLM coaching layer after the rules-based version failed on edge cases.

CalorIQ | React Native, Gemini Vision API, ARKit, Firebase **Oct 2024 - Dec 2024**

- Product Owner on a 9-person team; launched photo-based meal logging on the Gemini Vision API in an 8-week sprint, targeting unused dining hall nutrition data at UCLA.
- Launched to 300+ UCLA students; identified unprompted social sharing in post-launch data and shipped a friends feature.

LEADERSHIP EXPERIENCE

GLITCH | Vice President of Operations | UCLA **Nov 2024 - Jun 2026**

- Negotiated vendor contracts and secured partnerships with UCLA Samuelli, NVIDIA, and Google, reducing event costs by 40% while overseeing flagship and monthly hackathons for a 50+ member club.

Delta Sigma Pi Business Fraternity | Senior Vice President | UCLA **May 2025 - May 2026**

- Led a 20+ member executive board and ran meetings for 60+ active members, allocating a \$5,000 budget across professional, philanthropic, and social events.

SKILLS

Languages/Tools: Python, SQL, Anthropic API, Gemini API, LLM/agentic tooling, Pandas, Databricks, Git, Supabase (Postgres), Firebase, Google Cloud, Lovable, C++, Java, R, MATLAB, HTML/CSS

Product & Analytics: Slack, Jira, Confluence, Asana, Power BI, Tableau, Google Analytics, A/B Testing, Figma, Agile

Interests: NYT Crosswords, weightlifting, fantasy football, Texas Hold'em, pick-up basketball, backpacking, chess
